as he launches his
new book:

CANADA AND ISRAEL

BUILDING APARTHEID

yves engler

"Yves Engler's meticulously researched volume refutes, for anyone who still believes it, the myth that Canada is or ever has been an honest broker in the Middle East. Reading Engler's work leaves one with the inescapable and sad conclusion that the essence of Canadian policy has always been support for the establishment and continued dominance of an expansionist Zionist state in the territories that now comprise Israel, Gaza, and the West Bank. As a former Zionist youth leader, I thank Engler for setting the record straight and can only lament our country's historical and ongoing contribution to the tragedy enveloping the long-suffering peoples of the Promised Land, Arab and Jewish."

GABOR MATÉ

Physician and author of *In the Realm of Hungry Ghosts: Close Encounters With Addiction*

Red Publishing

"Yves became a foreign-policy expert by working as a night doorman in Montreal. ... He's in the mould of I.F. Stone, who wasted no time with politicians, who all have an agenda, but went instead straight to the public record."
