

Dear Mr MacKay:

There is a humanitarian crisis in Afghanistan. According to the latest information from the respected Senlis Council, aid is not reaching the people. Many are homeless and starving.

At the same time, Canada has committed our troops to a mission it cannot win – to destroy the Taliban. The aggressive actions of the troops are alienating the Afghan people and swelling the Taliban ranks.

The billions you are spending in armed fighting would be better spent on conflict resolution and meeting the pressing needs of the Afghan people.
